

Customer Information

Lead content of products

Dear Sir / Madam,

Under article 33 of the REACH Regulation we as product manufacturers are obliged to inform you if a delivered product contains more than 0.1% of a substance that is on the SVHC candidate list (<https://echa.europa.eu/de/candidate-list-table>).

The obligation to inform also applies to part-products which themselves match the product definition.

For this reason, we inform you that our products may contain lead at a concentration level of more than 0.1% and ask you take note of it.

This is solely related to lead as an alloy component in raw materials (steel, non-ferrous metals).

Lead

CAS number: 7439-92-1

EG number: 231-100-4

You will find the concerned Woelm products in a list of articles on our website www.woelm.de at the "Downloads" link.

Should there be a change to the current state resulting from an update of the SVHC candidate list by the ECHA, we will continue to meet our obligations under the REACH Regulations including our duty to inform.

Please do not hesitate to contact us if you have any questions.

Best regards

Woelm GmbH
